Re: **Recycled Steel Information**

Dear Jed:

The following is an update on recycled steel and how it pertains to our product.

With the many changes in the steel market over the last year, Metalwest has changed the sourcing on many of our products from integrated mills to mini-mills. Metalwest is sourcing a large amount of our metal (and all of yours) from mini-mill sources which will allow for Leed credits to be applied to this material (assuming all the other criteria are met) since it is 100% recycled steel.

One detail to note, the mills use almost exclusively a post-industrial recycled content versus a post-consumer material in order to get the properties needed to make a higher quality product.

Please let me know if you have any questions.

Sincerely,

Rob Donnellon
